Sessions: We Need To Help Those On Welfare Find Jobs, Not Import Labor To Replace Them

“This economy, this government, this America that has produced the greatest wealth, the greatest freedom, the greatest prosperity, the greatest growth, the greatest innovation the world has ever known, was not built on a state-dominated economy... We will make a mistake that we will regret, and it will be a colossal error for the future of this country if we alter that great characteristic of this fabulous country of which we are a part...”

We have a group of our excellent Senators—fine people—meeting in secret... They are plotting right now to pass us an immigration plan... You know what they tell us? ‘We can’t get workers. We’ve got to have foreign workers.’ [Yet] we’ve never had more people on welfare, never had more people on food stamps... Somehow this welfare office needs to be dealing with this

problem.”
